BUTTON: Resize the font from 18px to 16px
change font weight from 800 to 700

Replace this logo with our informal logo (I have pushed this SVG of the logo to GitHub)

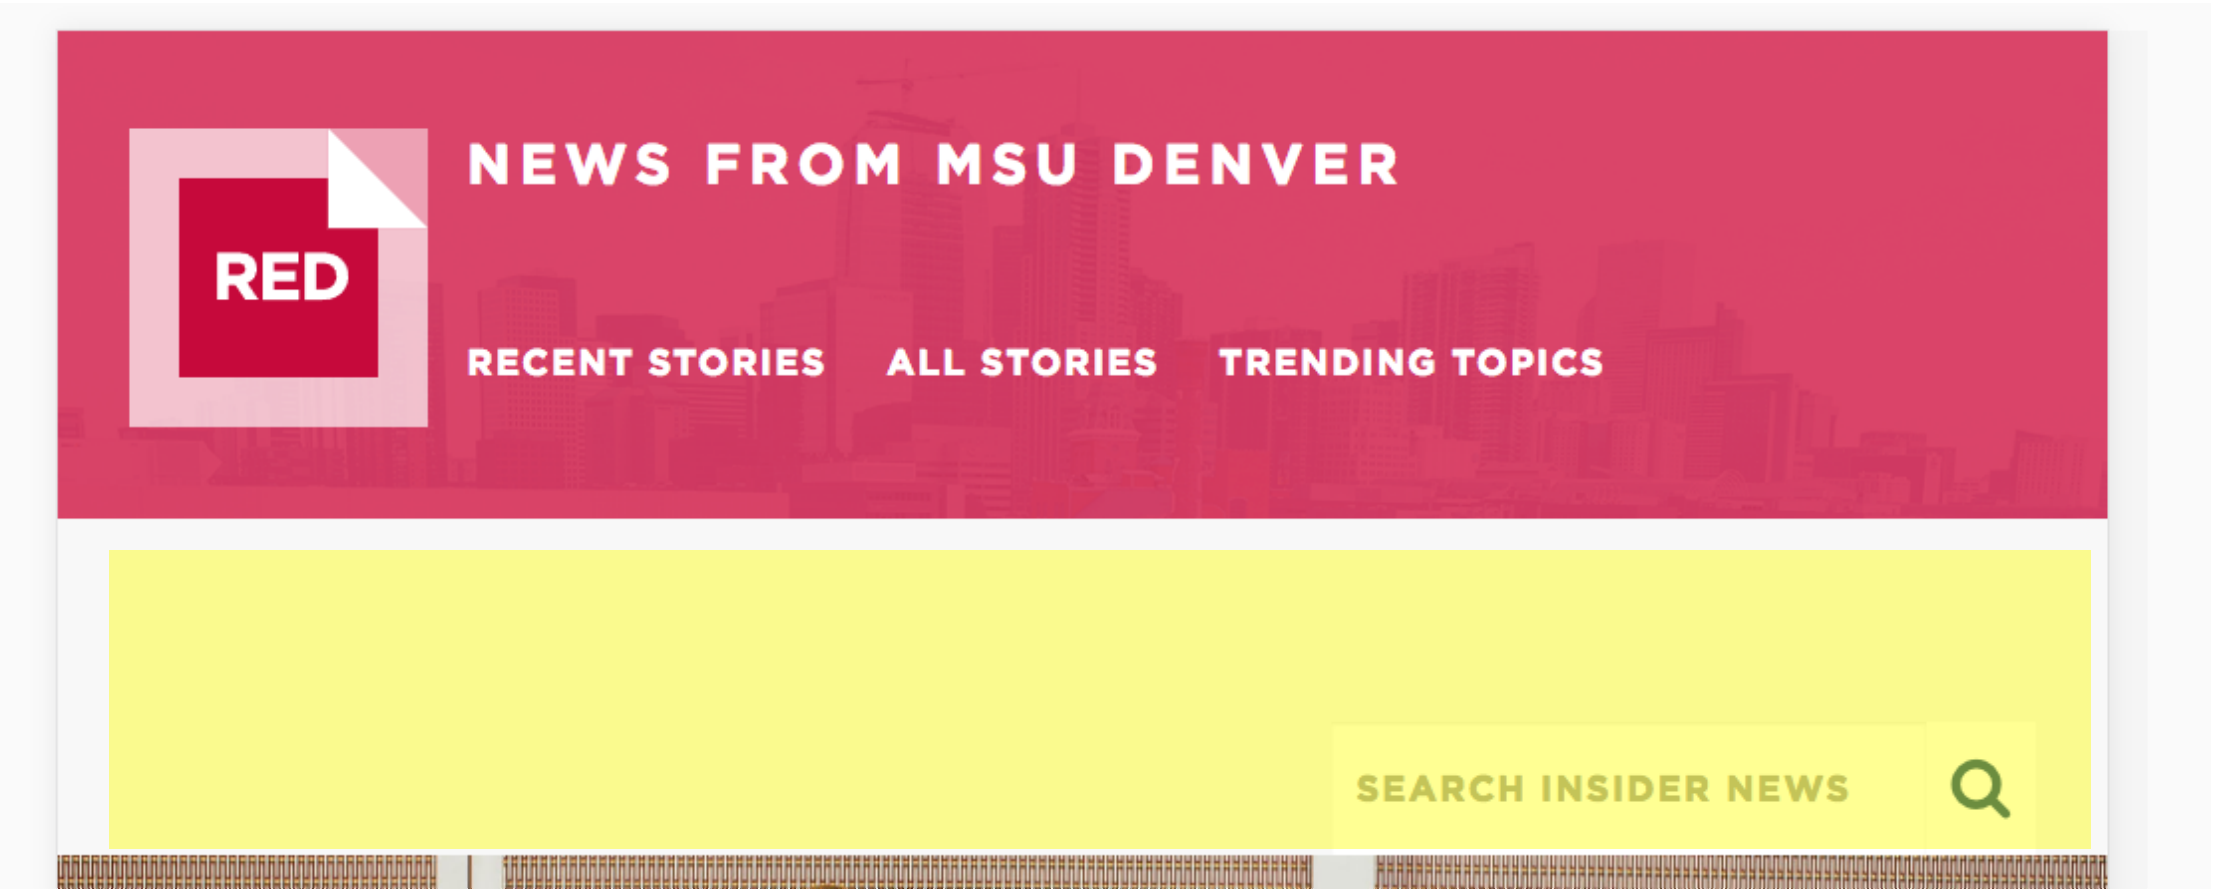

Resize logo to 300px (max-width)

Remove padding-top: 30px; from “footer .footer-body ul”

Center logo and social media icons

Desktop QA

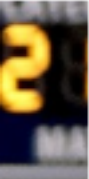

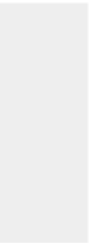

Around 1186 browser width, the header begins to break.

Nav links and search should stay on one line.

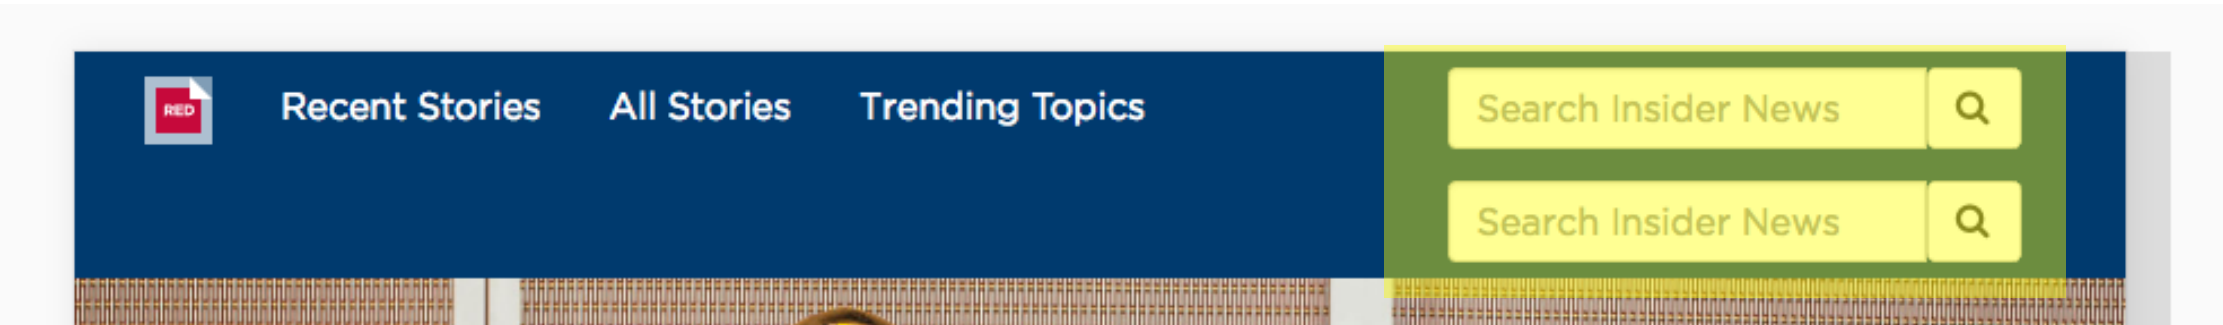

Resizing the search bar and nav font size fixed it on my preview.

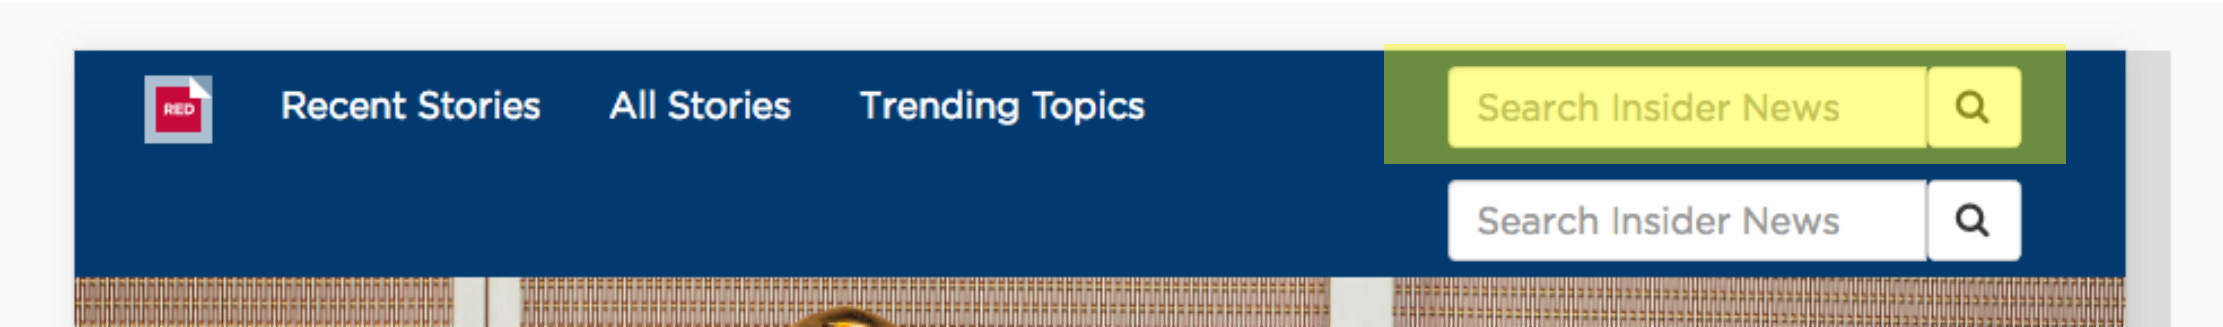

Side bar is missing the experts styles, those are listed in the redlines. Assets are also on GitHub.

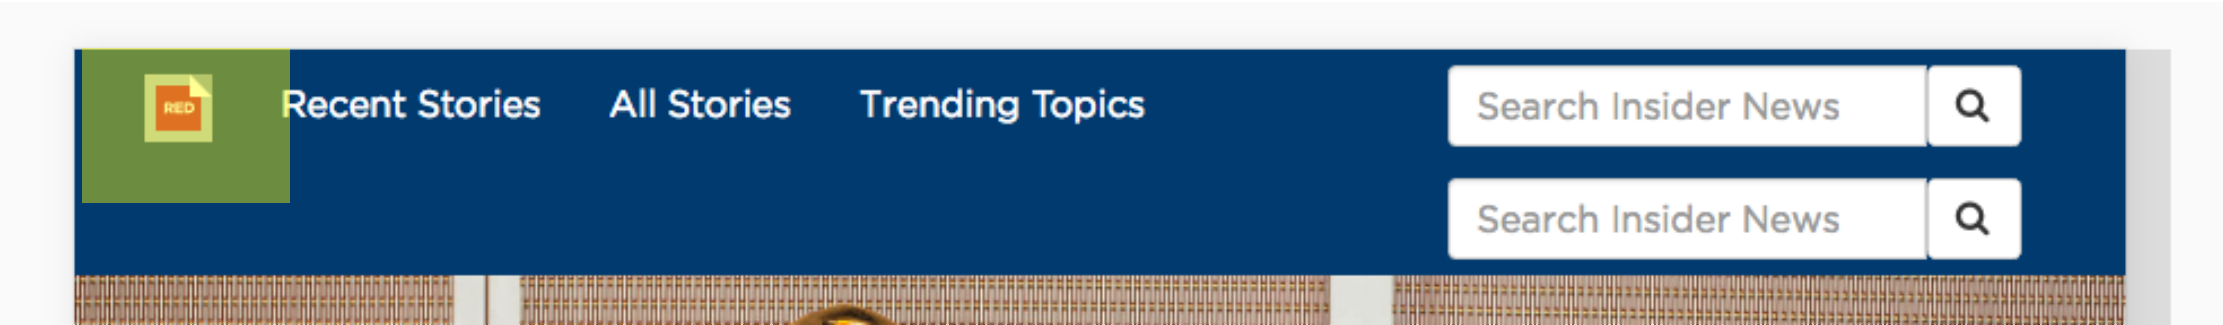

Tablet QA

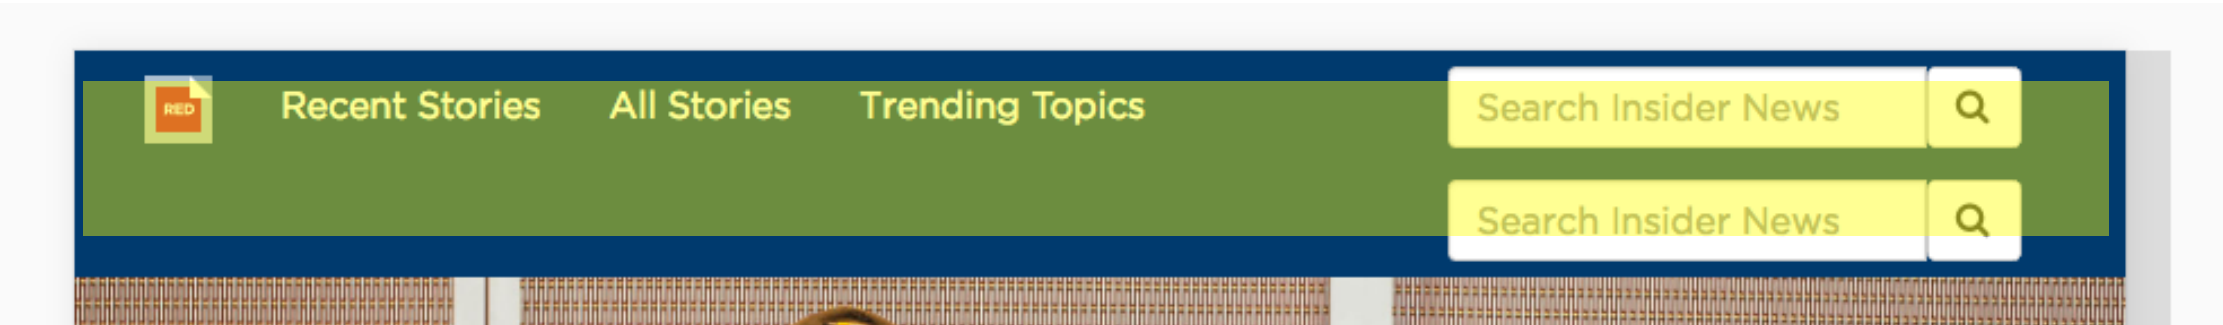

Around 961 browser width, the search is duplicated.

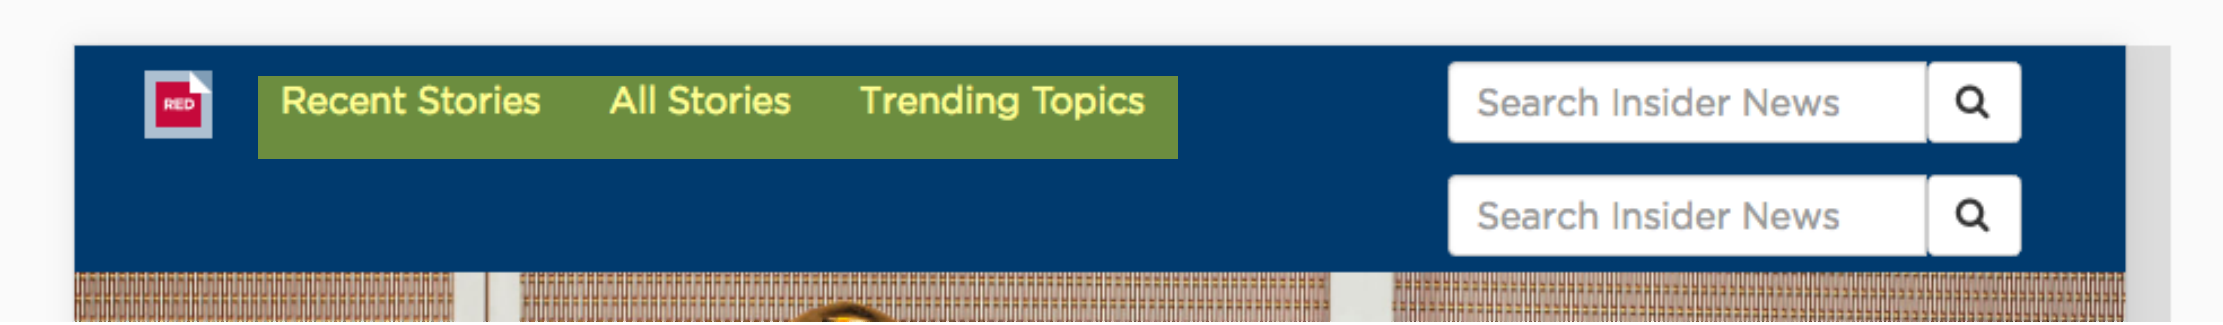

Inherit search style globally

Increase logo width and height to 75px

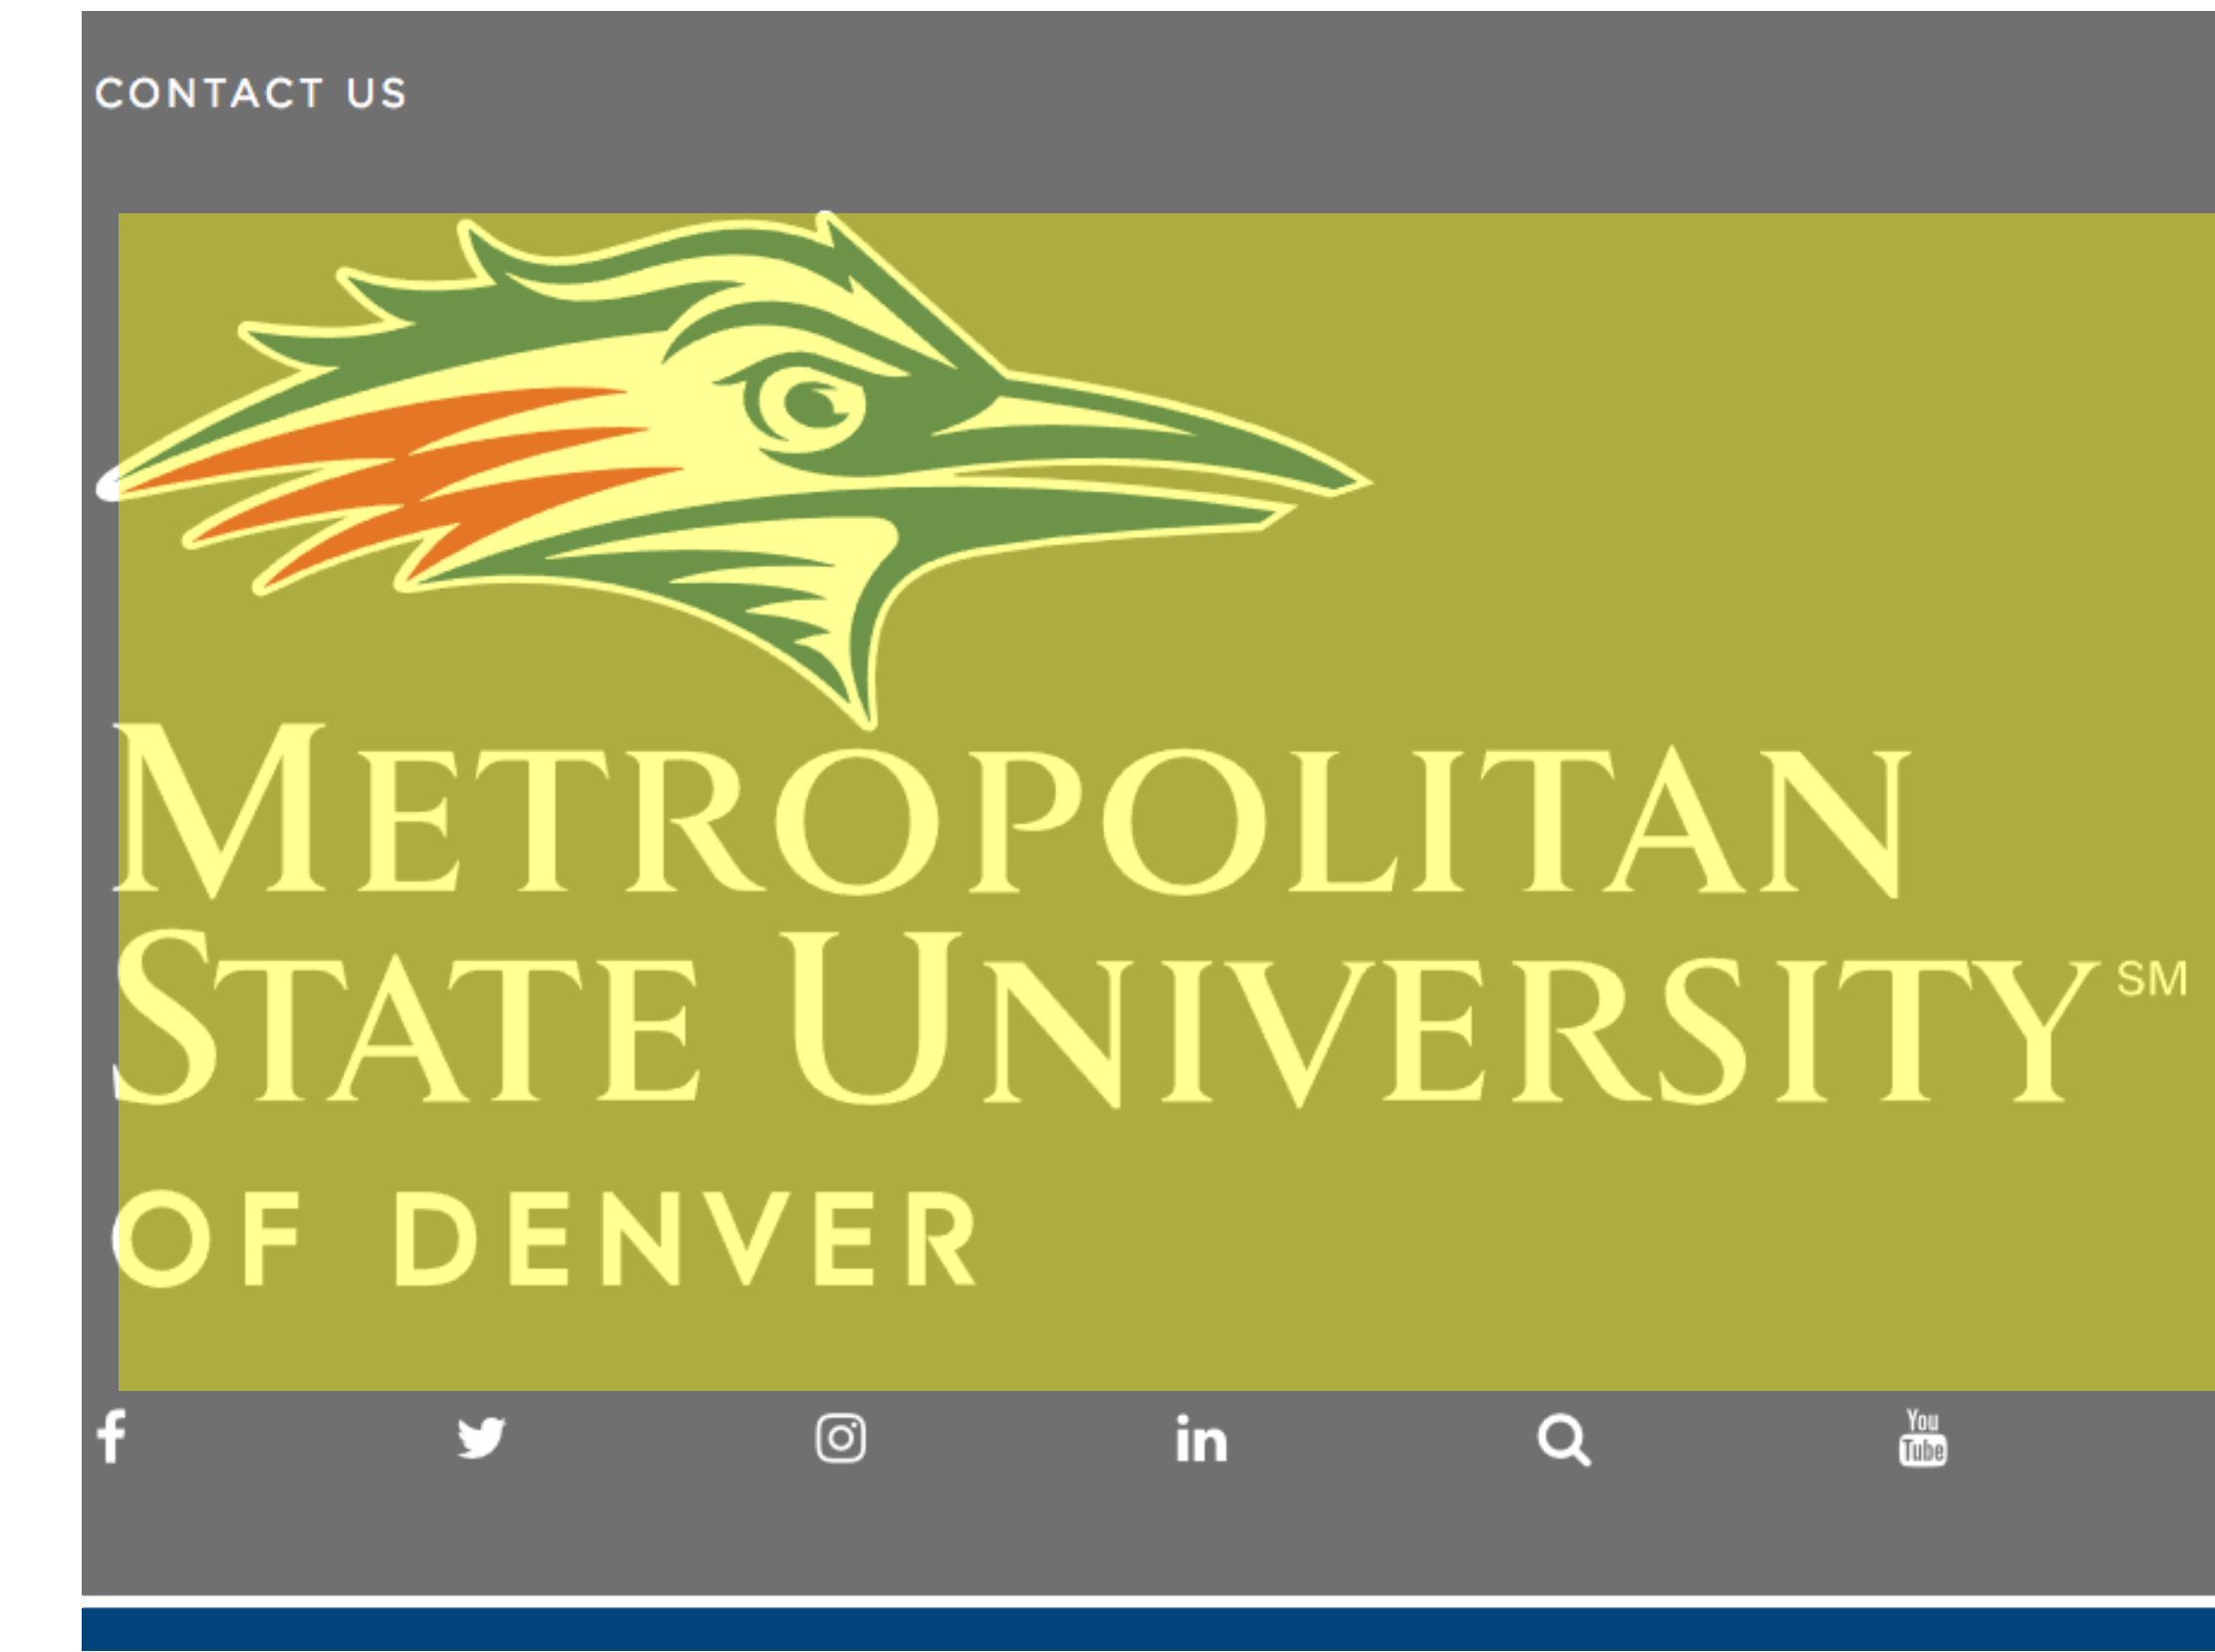

Change background color to #d11242

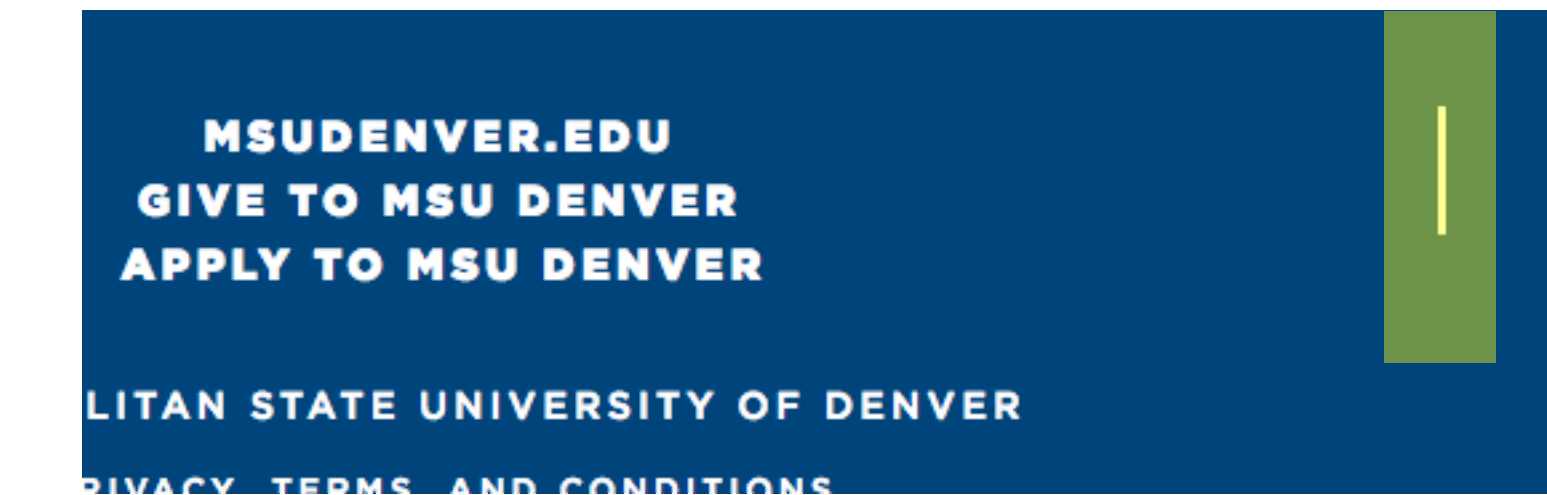

Inherit nav links style globally

Vertically center the nav links

Logo is very large on tablet

Same logo as desktop

Line is showing up on tablet view

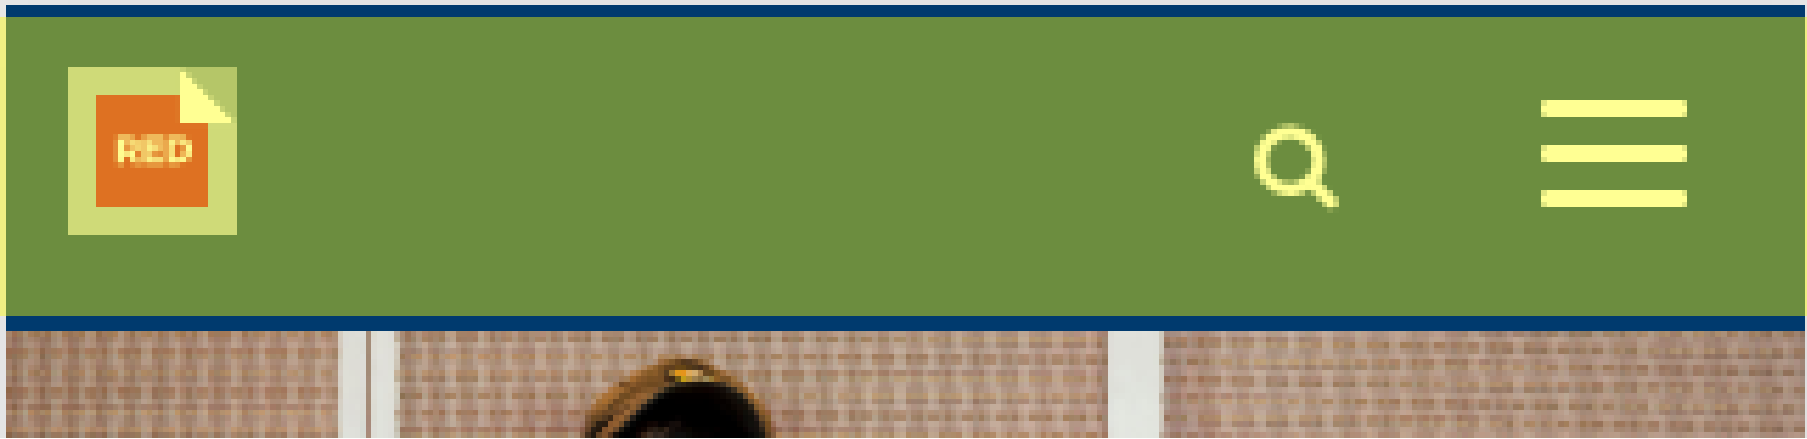

Mobile QA

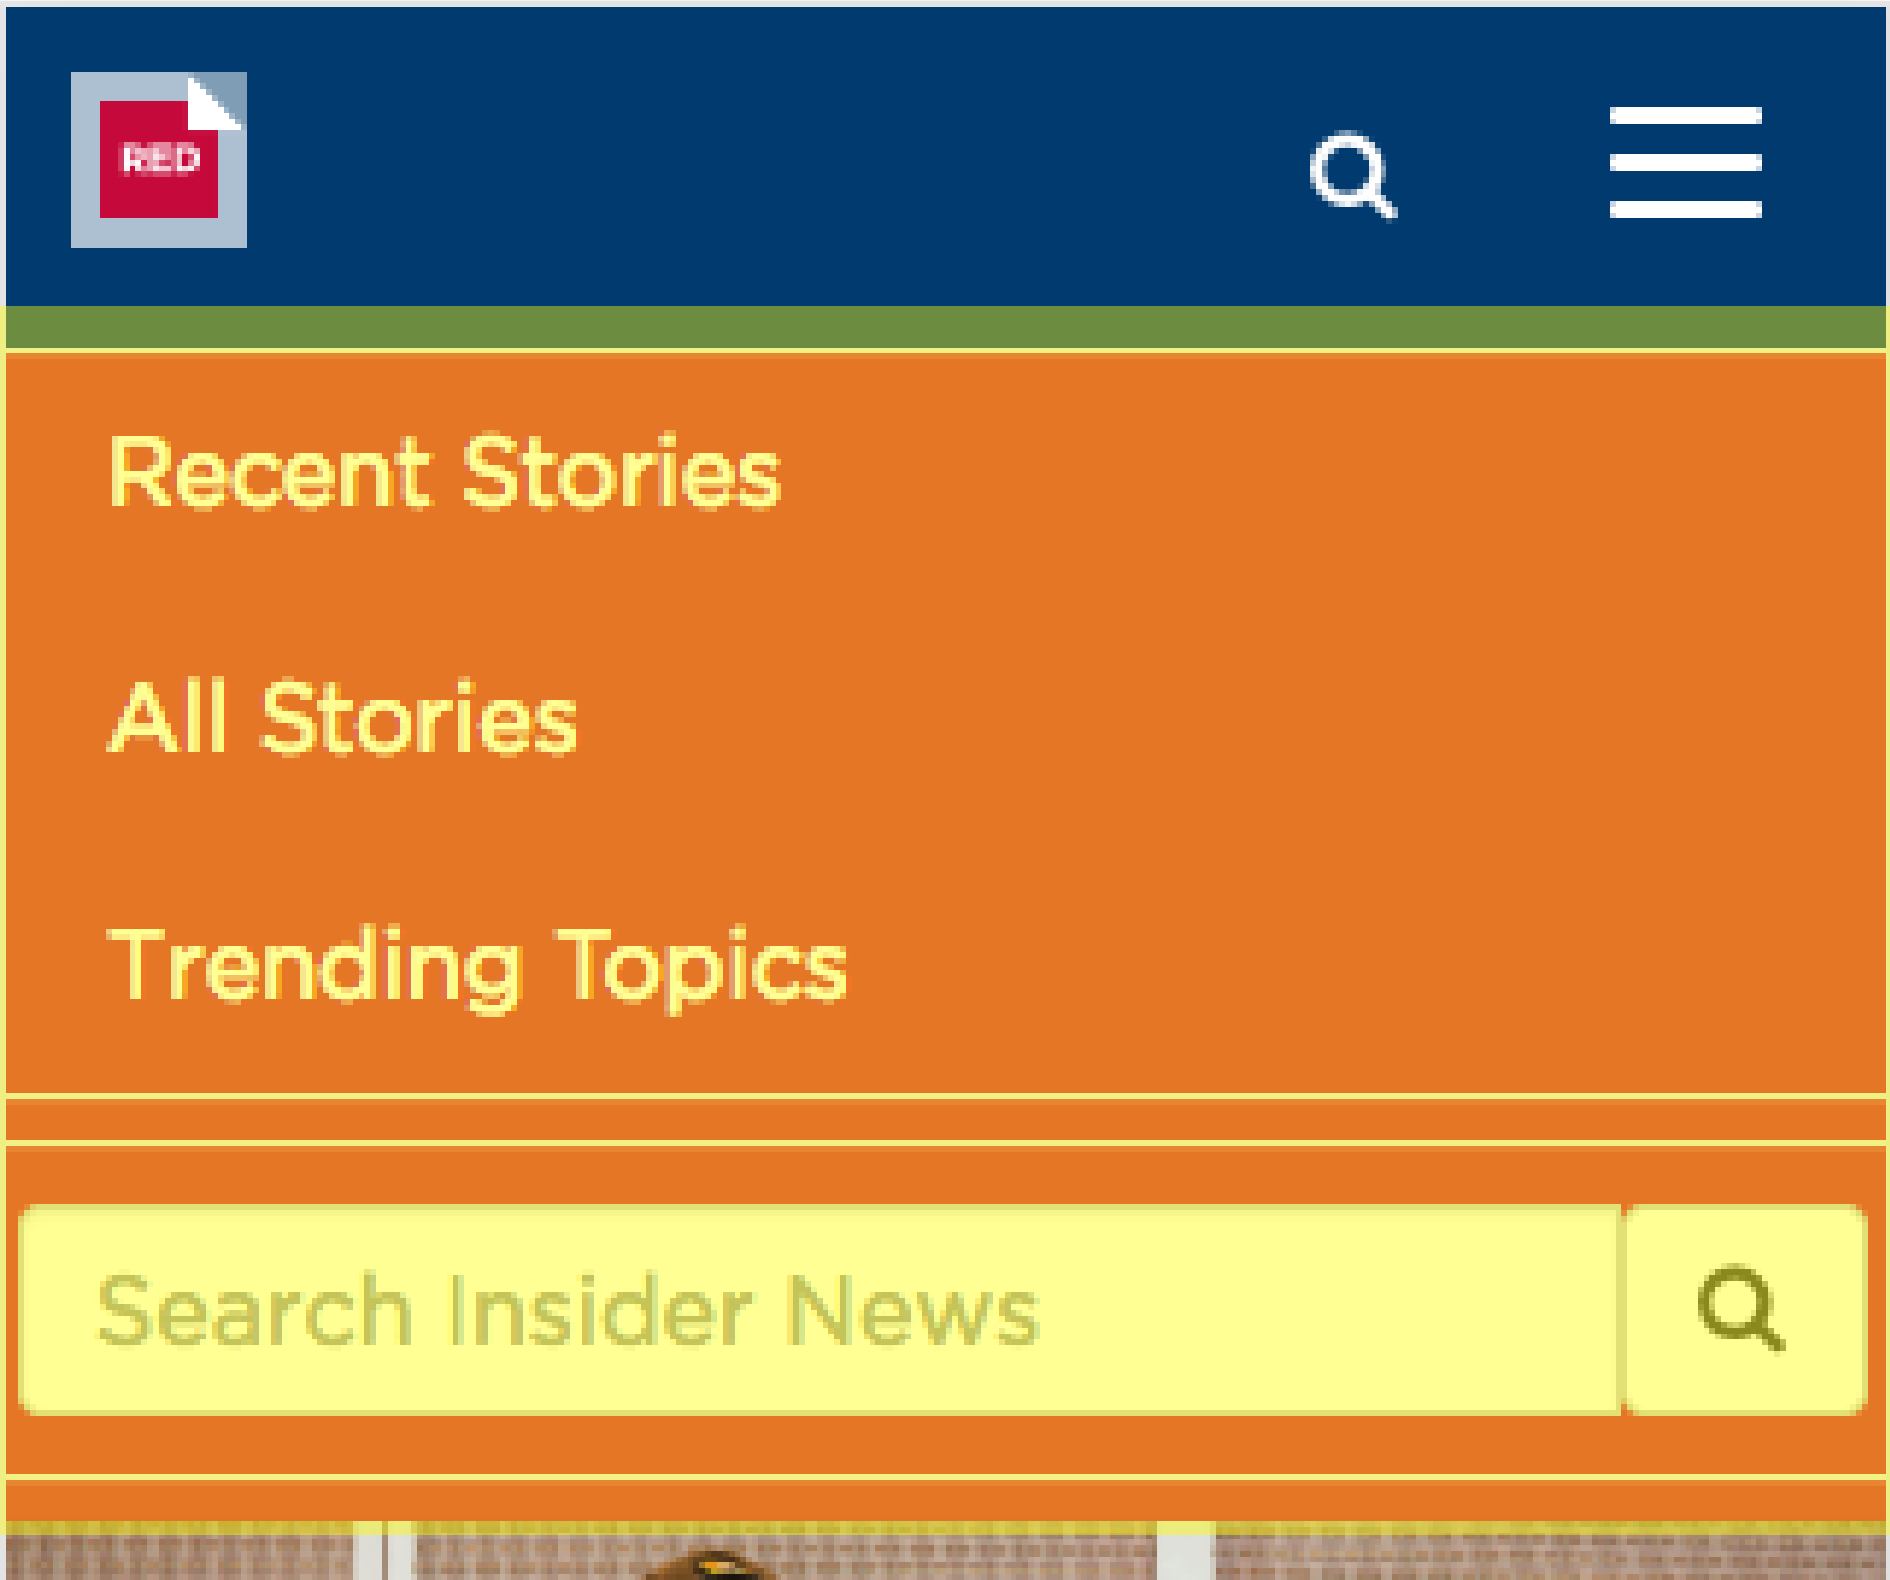

Remove the search icon and simplify header by moving the search bar inside the hamburger menu with the rest of the navigation

Increase the size of logo to 40px width and height

Change background color to #d11242

Inherit nav links style globally

Inherit search style globally

Remove lines above and below the search

Logo is very large on mobile

Same logo as desktop
